FOR IMMEDIATE RELEASE:

2020 Zero Emission Bus Conference Highlights Key Considerations for Electrifying Bus Fleets

The eighth-annual conference will provide transportation leaders with the information they need to successfully make the transition to clean vehicles.

ATLANTA, GA, August 2020 - The Center for Transportation and the Environment (CTE) is excited to host the 2020 Online Zero Emission Bus Conference from September 15-17. Leaders from all regions of the US will come together to discuss the unique opportunities and considerations for bus electrification. The conference is complimentary for all attendees.

Conference sessions will provide attendees with the latest information on zero-emission technologies, real-world deployment examples, and future opportunities for clean transportation in policy and beyond. From highlighting relevant case studies to debating battery and fuel cell electric bus solutions, the conference will feature engaging content based on best practices gleaned from the transit space. Additionally, federal policymakers and advocates will discuss programs that increase support for zero-emission buses, infrastructure, and workforce development.

Speakers include fleet representatives from transit, school bus, university, and airport sectors and relevant OEMs, technology providers, and policy professionals. Highlights of the more than 35 speakers include Denver RTD, Sacramento International Airport, StarMetro Transit, Twin Rivers Unified School District, University of Georgia, Champaign-Urbana MTD, St. Louis Metro, TriMet, and Cologne KVB. Keynote speakers represent North America's leaders in zero-emission technology: Proterra, New Flyer, Thomas Built, Ballard Power, BAE Systems, and Messer.

Registration is free and includes access to six main conference webinar sessions. To view the full speaker schedule and register, visit the official conference website at zebconference.com. CTE encourages attendees to consider giving an optional donation during registration to help support CTE's mission and share the conference with their networks.

###

ABOUT THE CONFERENCE

The annual Zero Emission Bus Conference is the premier event for planners, leaders, fleet operators, and technology experts interested in innovating the bus transportation industry with electric vehicle technology. Since 2011, CTE has hosted the ZEB Conference to educate industry professionals with practical information for making smart, informed electric bus and

infrastructure decisions. These clean vehicles offer many benefits but bring new considerations that require fleet managers to make intentional, data-driven decisions. The conference's goal is to bring together hundreds of industry stakeholders to discuss real strategies for transportation innovation and to learn more about how to prepare for electrification at scale. Learn more at zebconference.com.

ABOUT CTE

The Center for Transportation and the Environment is a 501(c)(3) nonprofit organization with a mission to improve the health of our climate and communities by bringing people together to develop and commercialize clean, efficient, and sustainable transportation technologies. CTE collaborates with federal, state, and local governments, fleets, and vehicle technology manufacturers to complete our mission. Learn more at www.cte.tv and follow us on Twitter [@Go_CTE](https://twitter.com/Go_CTE).
